RE: Blood boosting; Olympic Games

In preparation for the Olympic Games I am reviewing all avenues of preparation for our team, in addition to, bikes, wheels, clothing, sports psychologist, etc. One significant and controversial area of improving athletic performance is the area of blood boosting. Is it doping or illegal; my personal opinion and interpretation is no. This is one more area our cyclist will be behind the world of cycling if we do not keep up with sports medicine research.

I would like to take the opportunity to investigate its use with our team, but first we all must discuss this controversial topic. Please give me your opinion on this, I will do nothing further until I hear from you.
